Full stack web developer with video graphical knowledge to build more fascinating user experience on the web. Recently graduated from the George Washington University Coding Bootcamp, with newly learned skills in JavaScript, HTML/CSS, React.js and responsive web design. Studied Film and Video studies at George Mason University and able to use Adobe Premiere Pro, After Effects, Photoshop and Illustrator. Understanding how the user's data flows in the program, and looking for an efficient way to optimize web service environments. Always concentrating on solving problems. Imagine diverse solutions in my head and find out the most efficient way with enough discussion with teammates.
